## WHO AM I?

I'm a founder-engineer building transformative systems at the intersection of fintech, blockchain, and AI. As the Founder of Suiver and ApexoAI, I architect solutions that make crypto accessible to Africans and create career opportunities through AI-driven tools. I code with speed, lead with clarity, and build like tomorrow depends on it.

## TECH STACK & SKILLS

Frontend: React.js, Next.js, Tailwind CSS, React Native

Backend: Node.js, Laravel, Firebase, MongoDB, MySQL, Supabase

Blockchain: Smart Contracts (Sui, Ethereum)

Tools: Git, Postman, CI/CD, Render

Languages: JavaScript, Python, TypeScript

Soft Skills: Startup leadership, Agile team management, Product thinking, UI/UX design

## EXPERIENCE / PROJECTS

### Suiver – Founder & Smart Contract Dev

Revolutionizing Africa's crypto experience by building a decentralized crypto-to-fiat bridge. Designed secure cross-chain protocols for instant swaps and created an intuitive UX that makes Web3 accessible to everyday users. Leading community adoption by simplifying payments and onboarding hundreds into DeFi.

### ApexoAI – Founder & CTO

Building the future of work with an AI career co-pilot. Developed conversational resume and cover letter generation, live speech-to-speech AI interviews, and a sleek dark UI that feels like Apple meets LinkedIn. Empowered job seekers to land roles faster with personalized AI-driven career support.

### **Desight Foundation – Lead Developer**

Architected scalable web platforms with a clean React + Firebase stack. Led feature releases that improved engagement by 40%. Mentored junior devs and enforced code standards for team success.

### **CodeNotion – UI/UX Designer**

Delivered beautiful, conversion-focused user interfaces. Designed and tested flows that boosted app retention by 30%.

### **Divine Favour Int'l School – Graphics Design Tutor**

Taught design and digital creativity to teens during summer bootcamps. Introduced students to practical tools like Figma and Canva.

### **Ticket Marketplace for Nigerians – Frontend Engineer**

Developed a mobile-first ticketing platform for events in Nigeria using Next.js and Firebase. Handled registration logic, confirmation emails, and real-time tracking of attendees. Emphasized modern UI/UX design with strong branding.

### **Crypto Pattern Bot (R&D Stage) – Engineer & Analyst**

Built a bot to track on-chain events via Dexscreener API: rugs, pumps, tier-1 listings, CEX updates. Stored and analyzed coin performance to predict potential investment signals and risks.

## **COMMUNITY CONTRIBUTIONS**

- Mentored upcoming developers through Desight Foundation.
- Taught teens design and coding, inspiring the next generation of African builders.
- Sharing startup and dev knowledge with the Suiver community, making crypto and AI more accessible.
- Advocating for open-source and grassroots bootcamps across Africa.

## **EDUCATION**

🎓 Ritman University – Bachelor of Applied Science, Software Engineering (Jan 2025 – Oct 2029)

💻 SkillAhead Academy – Full Stack Web Development Certification (May 2023 – Nov 2024)

📘 Liora Institute – Engineer's Degree, Computer Science (2015 – 2020)

## **WHAT MAKES ME DIFFERENT?**

I don't wait for trends, I invent solutions ahead of them

I bring founder energy to every single project

I think like a strategist, build like an engineer, and ship like a startup

I write code that works and speaks business fluently

## FINAL WORD

If you want a developer who maintains things, I'm not your guy.

If you want someone who builds from scratch, leads with fire, and ships like a beast

let's talk.

Let's build something legendary.
